

Information System Planning

- I. VISION Testing – Assignments including system testing through User Acceptance Testing will be required. Local Agency Staff involvement is necessary to insure that bugs and defects are found prior to approval of system edits or enhancements.
- II. VISION Change Ideas – The Utah State WIC Office is a member of the Mountain Plains States User Group. All Utah WIC Staff continue to have the opportunity to forward change ideas (system enhancements) through the proper channels to be added to the master change idea list.
- III. EBT – Electronic Benefits Transfer. The State WIC Office has begun the planning phase for a transition from a check based benefit issuance system to e-WIC, an offline EBT smart card benefit issuance system.
